

SUNTOUCH® CONTROL SYSTEMS

SIMPLE AND ECONOMICAL CONTROL OF POOL AND SPA HEATING AND FILTRATION

The SunTouch system is the easy way to keep your pool and spa clean, comfortable and ready to enjoy. With the touch of a few buttons, you can quickly program your pool and spa filtration and heating cycles to fit your schedule. And it's just as simple to change programs or switch to manual mode for those unplanned, spontaneous plunges. With SunTouch systems, your pump and heater automatically run whenever you want, for as long as you want. So, your pool and spa are always warm and inviting.

In addition to controlling your pump and heater, the standard SunTouch system package has the ability to schedule operation of additional functions, such as your lights or automatic cleaner. You can also add a third valve actuator to automate a solar heating system or water feature.

- One-touch function control—no complicated routines to memorize.
- Ability to program pool and spa and two additional features. All circuits in the system can control four operating schedules (maximum six total schedules per system).
- Compatible with gas heaters and solar systems.
- Temperature control can be set in one degree increments.

AN ECO SELECT® BRAND PRODUCT

The Eco Select brand identifies our "greenest" and most efficient equipment choices. SunTouch systems can optimize energy use and equipment performance by automating and synchronizing equipment scheduling. This prevents problems and waste when users rely on their memories or limited time clocks to operate or turn off equipment.

SUNTOUCH® CONTROL SYSTEMS

The standard SunTouch system includes:

- Power center with push-button digital control panel and backlit LCD readout
- One circuit to control filtration and two additional accessory circuits available
- Two valve actuators for automatic switching between pool and spa mode (an optional third valve actuator can be added for use with auxiliary functions, such as solar panels)
- Two sensors to monitor air and water temperatures
- Built-in diagnostics
- Support for IntelliFlo® vF Variable Flow Pump, IntelliFlo Variable Speed Pump, IntelliChlor® Salt Chlorine Generator and QuickTouch® II Wireless Remote

REPLACE YOUR MANUAL TIME CLOCK WITH THE CONVENIENT, ECONOMICAL CONTROL SOLUTION.

If you're still setting your filtration and heating schedules with an antiquated time clock, it's time to upgrade with the SunTouch system! Designed for pool and spa combinations that share a common filtration system, the SunTouch system does all the work while you relax. Per your programmed schedule, the SunTouch system rotates motorized valves from pool mode to spa mode, allowing the heater to bring your spa up to your pre-selected temperature. When the programmed time is finished, the system switches back to pool mode. Should you decide to take an unplanned dip, simply switch to manual mode and control the valves with the touch of a button. Auxiliary circuits allow you to operate additional features, so you can set run times for your automatic cleaner, switch your pool lights on and off, or even schedule operation of your solar heating system. What's more, the SunTouch system can extend your pump and heater life, because your equipment won't be running when it doesn't need to. And you can even save on your utility bill by scheduling operation during off-peak electrical rates.

AVAILABLE FROM:

TAKE YOUR POOL AND SPA ENJOYMENT TO ANOTHER LEVEL

Your SunTouch system will give you even greater benefit when integrated with these innovative new products from Pentair:

QuickTouch II remote allows you to ready your pool or spa for relaxation from the comfort of your poolside lounge—or almost anywhere up to 250 feet from your pool equipment area.

IntelliFlo variable speed and IntelliFlo vF pumps reduce your utility costs by hundreds per year with these break-throughs in energy efficiency and whisper-quiet operation. See the IntelliFlo pump Cost Calculator at www.pentairpool.com/pumpcalc.

IntelliChlor generator converts common table salt into pure chlorine, keeping your water clearer and safer. No more handling and storing chlorine, and no more odor, stinging eyes or irritated skin!
